

We had the most fantastic Science Week!

'Blue Planet' was a brilliant theme and it helped us to learn lots of things in science.

We were brilliant scientists and used our science skills throughout the week.

On Monday we had a launch assembly where every class were given a pet goldfish from the PTA.

Exciting science learning was happening throughout the school all week.

Mr Sabin, our science governor, came to visit.

Year 2 were visited by some marine biologists who came to talk about pollution in our oceans.

We went on an amazing visit to the Sealife Centre where we could see lots of real life sea creatures. We learnt lots of facts about them and were able to see for ourselves how they are adapted to live in the sea.

Science ambassadors from the Junior School and Mr Fox came to help us with our science investigations.

On Friday every class displayed their learning in the hall and we were able to go and see all the brilliant science that had been going on all week.

To finish off the week, parents were invited into school to see what fantastic science learning we had been doing all week.
