

Telford Infant School  
**LOVING LEARNING**  
Vision for Science

At Telford Infant School we ensure that:

1. Children's curiosity is promoted by encouraging them to ask lots of questions.
2. Every science lesson is exciting, fun and practical.
3. Children have the opportunity to use enquiry skills, such as prediction and observing, in every science lesson.
4. Every classroom has a science investigation area where children can practise their enquiry skills and investigate their own questions.
5. We respond to exciting scientific events that are happening in our world as they happen.
